ACESO™

A Salon Solution designed to provide support to the symptoms of some common nail conditions by penetrating through the nail plate onto the nail bed and the surrounding soft tissue.

The products use natural bio-actives to support the results.

Our Goddess of Nail Recovery

POWERED
BY NATURAL
BIO-ACTIVES

The ACESO System

ACESO may address symptoms associated with common nail conditions.

ACESO natural actives include:

Quillaja

Tannic Acid

Clove Extract

Tea Tree Oil

Betaine

Unfortunately, there are no “quick fixes” when it comes to addressing these nail conditions. This is because a new toenail must grow to replace the old, damaged toenail. This time frame varies on how fast or slow your toenails grow and how severe the nail condition is.

Affected fingernails tend to progress more quickly since they grow faster and have a less harsh environment

Positive results from the ACESO System are wholly dependent on the Client’s adherence to the use protocol.

The ACESO System is not a drug. It has not been reviewed or approved by the FDA to Diagnose, Prevent, Treat or Cure any nail conditions.

ACESO Kick Start Soak

Kick Start Soak prepares the feet/nails in the salon to effectively begin the ACESO System. It utilizes natural bio-actives and oil absorbers.

Kick Start Soak’s natural actives include:

Quillaja, Tea Tree Oil, Clove, and Citric Acid

ACESO Step 1

Applied to the surface and/or under the nail plate onto the nail bed.

Step One’s natural actives include:

Tea Tree Oil, Clove, and Betaine.

ACESO Step 2

Applied to the soft tissue around the nail plate and between the fingers and toes.

Step Two’s natural actives include:

Tea Tree, Clove, Tannic Acid, and Prolomine

ACESO Debrider

- Debrider is used to “flush out” dead tissue and debris between the nail plate and nail bed.
- Debrider aids in allowing new nail growth to more quickly attach.

Debrider’s natural actives include:

Quillaja
